Thank you Gary, I will let the Coalition know. Will the USGS put in a gauge that can continuously monitor the river velocity or monitor the velocity on more than one occasion?

Also, I will unfortunately have to leave the CAC meeting for an event that I committed to months ago. I am looking forward to the meeting though and am happy to see that Lisa Gossett received an invite.

Thank you,

(b) (6)

FYI, I will be at the San Jacinto site on Thursday (2/19) with the USGS – they will be using a boat/tool to measure the river velocity around the site.
